

Dear MEA Prayer supporter,

May I let you know that Maasai Evangelistic Association have made an excellent progress on the construction of the **Maasai Girl's Rescue Center**. We continued building the walls up ring beam level on the first Girl's dormitory. We recently completed putting the roof and internal walls are plastered (and undercoat applied to the dorms), doors and windows frames fitted and water tank installed in the loft space. Also, the pit latrine walls are complete and the slab has been laid for the washroom.

We were also able to paint the main building and painting the latrine block, as well as building the washrooms.

The estimated cost to get the building finished is **£18,000** or 28,000 U.S Dollars (which includes building a septic tank). We also hope to raise a further **£3,000** (4688 U.S Dollars) for beds and other furniture-so the home is ready for the girls and matron to move in. **Thank you so much for all you have done to raise funds so far-** please keep up the good work, so the building can be occupied later this year! Your continuing support will be highly appreciated.

David.
